YEARBOOK 2025

About Us

With a legacy spanning three decades, Kannan Infra Projects India Pvt. Ltd. stands as a trusted name in the construction materials and infrastructure industry. Established in 1990, we've evolved from pioneers in sand and aggregates to innovators in automation-driven manufacturing.

30+ YEARS INDUSTRY EXPERIENCE

From our 100-acre mining campus in Murungatholuvu, Chennimalai, holding 10 million tons of premium blue metal reserves, we deliver consistent quality and reliability across every order.

Our 150 TPH 4-stage sand manufacturing plant, powered by PLC automation and Computer Vision, ensures IS-standard quality with enhanced efficiency and sustainability. As the nearest blue metal quarry to Erode, we promise faster delivery, smarter technology, and sustainable operations.

Message from Leadership

From the MD's Desk

At **Kannan Infra Projects India Pvt. Ltd**., our journey of over **three decades** stands as a symbol of **dedication, trust,** and **consistency**. From our humble beginnings to becoming one of Tamil Nadu's most respected names in construction materials, our growth has always been guided by a commitment to quality and customer satisfaction.

Having witnessed the evolution of this industry for more than 35 years, I take pride in how we've blended experience with progress — balancing traditional values with modern practices. Every milestone we achieve reflects the hard work of our team and the trust of our valued clients.

Chandravathani Govindasamy
Managing Director

From the Executive Director's Desk

Sowmesh Nithil Govindasamy
Executive Director

At Kannan Infra Projects India Pvt. Ltd., we believe progress happens where people and technology meet with purpose. With a passion for innovation, I have focused on integrating **computer vision–based automation** and **AI-driven systems** to enhance performance, efficiency, and real-time decision-making. Our goal is not just to keep pace with change but to lead it—by building a smarter, data-driven future for KIPIPL. As we move forward, we remain committed to operational excellence, employee growth, and delivering superior value to our customers.

From the Director's Desk

At KIPIPL, execution is our strength and precision is our principle. Every project we undertake is driven by clear planning, teamwork, and a commitment to deliver on time with uncompromised quality. Our focus has always been on **turning ideas into action** — optimizing operations, improving productivity, and ensuring every process runs seamlessly from quarry to delivery. As we continue to grow, our goal remains simple: to execute efficiently, perform consistently, and build with integrity.

Rohith Nithil Govindasamy
Director

Corporate Social Responsibility

Building Communities, Preserving Nature, Inspiring Change

At **Kannan Infra Projects India Pvt. Ltd.,** we believe true growth is not only measured by business achievements but also by the positive impact we create for our society and environment. Through our CSR initiatives, we continue to contribute towards sustainability, public welfare, and community engagement — building a greener and more compassionate tomorrow.

1. Supporting Live Tree Transplantation with ERODU SIRAGUKAL

As part of our green commitment, we proudly partnered with **ERODU SIRAGUKAL**, a registered charitable trust (Reg. No. V/7 of 2013), to relocate a **120-year-old banyan tree** near Vellode Kalingarayan Statue to **Vellode Birds Sanctuary**.
Kannan Blue Metals extended **financial support, manpower,** and **transportation facilities** to make this noble cause successful.
This initiative not only saved a century-old tree but also inspired the younger generation to protect and preserve our environment.

2. Beautifying and Maintaining Perundurai RS Roundabout

Since **February 2025**, we've been maintaining the **Perundurai Railway Station Roundabout**, transforming it into a green and welcoming space.
Our team ensures regular **cleaning, watering,** and **nurturing** of saplings and flowering plants two to three times a week, turning a busy intersection into a model of civic responsibility and natural beauty.

3. Plantation Drive with Lions Club & ERODU SIRAGUKAL

Together with the **Lions Club of Chennimalai** and **ERODU SIRAGUKAL**, we have undertaken a **town-wide plantation drive** across **Chennimalai**, planting over **300 saplings.**

These trees serve as **shade, shelter for birds,** and **a source of fresh air**, enhancing biodiversity and promoting healthier living spaces for both people and wildlife. The planted saplings are also being regularly maintained by **Kannan Blue Metals**.

4. Sponsorship for Ambitious Run Marathon 2025

We proudly sponsored for the **"Run Ambitious Marathon"** held on **June 22, 2025**, at **Erode Arts and Science College**, organized by **BNI Azpire Erode**.

The event featured both a **2–5 km family health run** and **a 10 km professional marathon,** promoting **fitness, family bonding, and health awareness** among the people of Erode.

Through this initiative, we reinforced our belief that a healthy community is the foundation of sustainable progress.

Commitment That Goes Beyond Business

From saving trees to inspiring fitness and beautifying public spaces, every step reflects our core philosophy **— building responsibly for people, planet, and progress.**

KIPIPL remains dedicated to creating a legacy of **green action and community empowerment** that endures for generations.

2025 Year Book

Redefining Sustainable Mining

Kannan Infra Projects India Pvt. Ltd. (KIPIPL) takes pride in being the first in Tamil Nadu to introduce an Electric Excavator for quarry and mining operations — a major step toward a zero-diesel, fully electrified mine.

Challenge

- High diesel usage, high operational costs and carbon emissions.
- Regular maintenance and noise pollution affected efficiency and environment.
- Need for a cleaner, smarter, and cost-effective mining solution.

Solution

- Introduced **Electric Excavator** under **DGMS** norms for sustainable quarrying.
- Powered by **smart electric drive systems** with high torque output.
- Integrated with **real-time monitoring** for performance tracking.
- Supported by **solar energy plans** for future electrified mines.

RESULTS

- **60% lower operating cost** and **zero fuel emissions.**
- **Reduced noise & vibration**, improving work safety and comfort.
- **Higher uptime, lower maintenance,** and **a smaller carbon footprint.**
- Set a **new green standard** for Tamil Nadu's mining industry.

Vision

- By 2030, KIPIPL aims to power its entire Blue Metal quarry operations through a **3-megawatt solar power plant**, achieving **zero diesel consumption**.
- This step aligns with our dream vision — the **Dark Concept Factory**, a fully automated, lights-out operation where **AI, robotics,** and **electric machinery** work seamlessly 24/7.

Our Electric Excavator marks the beginning of a greener revolution in mining.

— KIPIPL Management Team

INFRA PROJECTS

ELECTRIC EXCAVATOR
THE GAME CHANGER

Human Resource Management

At Kannan Infra Projects India Pvt. Ltd., our people are the foundation of our success. We believe that a motivated, skilled, and safe workforce drives both operational excellence and innovation.

Employee Engagement

We foster a workplace built on trust, teamwork, and growth. Through **regular engagement programs, recognition events, and team activities**, we strengthen collaboration and align our workforce with the company's vision and values.

Safety Culture

Safety isn't just a policy — it's our promise. We maintain **zero-compromise standards** through daily safety briefings, protective equipment, and real-time monitoring systems. Every employee undergoes **periodic safety drills and awareness sessions,** ensuring that safety remains part of our DNA.

Training & Development

We invest continuously in people development through **technical training, leadership programs, and skill enhancement workshops**. Our HR team collaborates with internal experts and external trainers to ensure every employee stays equipped with the latest knowledge, technologies, and industry practices.

Empowering the Workforce for Tomorrow

With a blend of technology and talent, we are nurturing a workforce ready to lead the next phase of **industrial automation and sustainable infrastructure** growth in Tamil Nadu's construction ecosystem.

Global Representation — GETS Sri Lanka 2025

In a moment of great pride for **Kannan Infra Projects India Pvt. Ltd.**, our Executive Director, **Mr. Sowmesh Nithil**, was appointed as the **Global Representative of Sri Lanka for Tamil Nadu** for the prestigious **Global Expo & Trade Summit (GETS) Sri Lanka 2025**.

This appointment, officially recognized by the **Prime Minister's Office** of Sri Lanka and led by the **Ministry of Science and Technology**, underscores Mr. Nithil's leadership and commitment to building international business relations. In this capacity, he has been entrusted with promoting **foreign investments, marketing,** and **social development initiatives**, representing Tamil Nadu on a global stage.

CERTIFICATE OF APPRECIATION

This certificate is proudly presented to

Mr. SOWMESH NITHIL GOVINDASWAMY
Investor - Kilo Biriyani

in recognition and sincere appreciation of your valuable support and contribution to the successful Curtain Raiser of the Global Economic and Technology Summit (GETS) Sri Lanka 2025, held on 17th September 2025 at The Kingsbury Hotel, Colombo.

Your commitment and participation have greatly contributed to creating momentum and paving the way for the success of GETS Sri Lanka 2025, which will be held from 10th to 12th November 2025

Presented on: 17th September 2025
Venue: The Kingsbury, Colombo

Dr. A.U.L.A. Nilmy
Founder
GETS Sri Lanka 2025

His key responsibilities include:

- Coordinating and overseeing all GETS Sri Lanka–related operations in Tamil Nadu.
- Leading marketing, branding, and awareness initiatives for the summit.
- Collaborating with businesses, institutions, and government bodies for active participation.
- Working in close liaison with Sri Lanka's Diplomatic Missions in India.
- Facilitating participation from entrepreneurs, innovators, and investors across Tamil Nadu.

"Building bridges beyond borders — representing Tamil Nadu at GETS Sri Lanka 2025."

— Mr. Sowmesh Nithil, Executive Director, Kannan Infra Projects India Pvt. Ltd.

Case Studies on Innovation

Computer Vision–Based Jaw Automation: Smarter, Safer, Sustainable

At **Kannan Infra Projects India Pvt. Ltd.**, innovation drives every step of our mining and manufacturing operations. Our latest breakthrough — the **Computer Vision–Based Jaw Automation System** — transforms traditional crusher operations into a smart, AI-driven process.

CHALLENGE:

Jaw crusher feeding required continuous manual monitoring to avoid idle running and overloading. Human dependency led to inconsistent production and energy loss.

INNOVATION:

Integration of **AI + Computer Vision** through a CCTV system to monitor feeder status in real time — detecting empty or full feed conditions automatically.

KIPIPL SOLUTION:

An AI model trained on live camera footage now controls the jaw crusher feed cycle. The system pauses or resumes operations autonomously based on visual input, without human intervention.

IMPACT:

Pioneering a new era of **AI-driven mining automation**, turning traditional crushers into intelligent, self-regulating machines.

"Where Artificial Intelligence meets Industrial Strength - redefining how we see, think, and build."

Grey Matter — A Concept Farmhouse

Grey Matter is more than just a structure — it's a statement of innovation, strength, and creativity. Conceptualized and executed by Kannan Infra Projects India Pvt. Ltd., this unique farmhouse is inspired by the Ben 10 character "Grey Matter" — symbolizing intelligence, precision, and engineering brilliance.

Set entirely in **elegant grey tones**, this project showcases the power and beauty of our own manufacturing strengths

- ✅ **Solid Blocks**
- ✅ **M-Sand**
- ✅ **Ready-Mix Concrete**

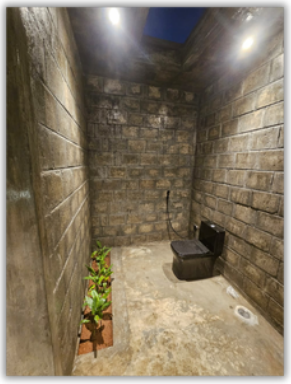
The highlight of Grey Matter is a **ready-mix cast swimming pool** — 30 ft in diameter and 13 ft deep — a true example of our **material strength, surface perfection, and design expertise**.

Every detail, from the **rugged stone walls** to the **refined concrete finishes**, reflects our in-house capability to turn raw materials into architectural masterpieces. Built using our own resources and creative engineering, Grey Matter stands as a **proof of concept** for sustainable, high-performance construction using indigenous materials.

At its heart, Grey Matter represents our philosophy —

> **"At Kannan Infra, innovation means transforming materials into possibilities.**

Through this project, Kannan Infra Projects demonstrates how functional design, durability, and creativity can coexist — powered entirely by our materials, our people, and our vision.



Sand Sieving & Conveyor Automation

1.Tiles Sand Sieving: Precision through Technology

At Kannan Infra Projects India Pvt. Ltd., innovation meets precision with our Thermal & Sonic Sand Sieving Unit, now enhanced for Tiles Sand Sieving applications. Using a thermal dry method combined with ultrasonic vibration technology, the system super-sieves M-Sand to achieve ultra-fine, moisture-free particles ideal for tile mix production. This advanced process ensures exceptional uniformity, improved bonding strength, and reduced reprocessing — delivering premium-quality M-Sand tailored for precision tile sand needs.

"Innovation is precision — every grain refined is a step toward perfection."

2.M-Sand Conveyor Automation: Efficiency in Motion

Efficiency isn't just about speed — it's about doing more with less.

Our newly developed **M-Sand Conveyor System** stands as a breakthrough in sustainable material handling. Capable of transferring over **1,000 units seamlessly**, this fully electric conveyor replaces diesel-powered loaders for shifting, reducing carbon emissions and manual dependency.

By automating sand transfer from the blue metal crushing zone to the storage area, the system enhances safety, reliability, and energy savings.

It represents a pivotal move in our roadmap toward a **zero-diesel, fully electrified mining ecosystem** across our 100-acre operational campus.

"When efficiency moves on electric power, sustainability follows."

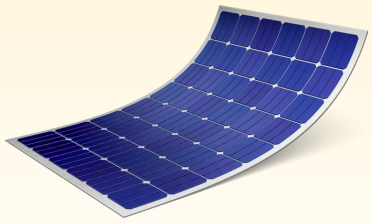
Strategic Roadmap 2025–2030

FOUNDATION FOR CHANGE

- Initiated transition to electric-powered machinery.
- Introduced the first **Electric Excavator** in Tamil Nadu's mining sector.
- Began solar feasibility studies for our 100-acre site.

SMART INTEGRATION

- Implementation of **AI-based automation and computer vision systems** for crusher and plant monitoring.
- Expansion of electric forklift and loader fleets.
- Pilot project for partial solar-powered operations.



GREEN EXPANSION

- Install large-scale **solar grid** to power crushing and batching units.
- Introduce **EV-based transportation** for material movement.
- Deploy **Digital Twin Monitoring** for predictive maintenance.

ZERO WASTE INITIATIVE

- Establish **circular material reuse systems** across all divisions.
- Enhance water recycling and dust suppression systems.
- Achieve **80% reduction** in diesel consumption.

A GREENER LEGACY

- Complete **Zero Diesel, Fully Solar-Powered Mining Zone.**
- Positione] KIPIPL as a **national leader in sustainable mining innovation**.
- Expand R&D initiatives to replicate this model across future projects.

NEWSLETTER 2025

Team Message: Innovating the Future, Together

At KIPIPL, every milestone begins with a shared vision — and a team that turns that vision into reality. This year, we've embraced innovation not just as a goal but as a mindset — transforming challenges into opportunities and ideas into automation.

Author's Note: A Story Worth Telling

This edition captures more than achievements — it reflects evolution. From automation to sustainability, each page tells a story of how we've grown through innovation and teamwork.

To our readers: Your continued trust inspires us to push boundaries and redefine excellence. As we close this chapter, we look ahead with renewed energy and purpose.

Until next milestone,
Navaneethan Gunasekaran and the KIPIPL team
